KF10/CEØX

SAN FELIX

*It is better to be uninformed
Than to be misinformed.*

-- Thomas Jefferson

What began as a planned five-operator, three rig, seven day expedition to San Felix ended as a one-man, three day, surreptitious activity on Oct 15, 16, and 17. KF10 sandwiched 700 contacts into his commercial work schedule before being asked to leave two days ahead of schedule.

Bob Read, KF10, was on San Felix doing electronic survey work on behalf of the Chilean government for his American company. He carried with him top secret security clearance papers and authorization for amateur radio, but the island's commandant was not impressed and amateur radio was very low key.

Read will file a written report on his findings and recommendations; sometime in the future another visit may be made to San Felix to do the required work to the island's communications systems.

It is common knowledge among such groups as Amnesty International that not only does San Felix have military fortification, but also it "houses" a number of political refugees from Chile's recent past. It is virtually off limits to all Chileans.

Two possible sources of the pressure

which resulted in Read's being asked to leave the island early have been mentioned: the first is that some Chilean hams were unhappy at an outsider being able to obtain operating permission for San Felix when the Chileans cannot, and, second, that a Chilean official had promised an American ham friend operating permission first for San Felix. Actually, the amateur radio license for CEØX is easy... getting permission to visit the island is what is so tough.

Send your QSL only to Bob Read, SVØBV, c/o the QSL Bureau, Box 564, Athens, Greece.

Lots of business in our transparent DXCC stickers...270, 290 still needed. Send your spares and request for your needs to TDXB today!

c Copyright 1981 The DX Bulletin

The DX Bulletin (ISSN 0279-8077) is published weekly for \$26 per year in the U.S., Canada and Mexico; all others \$35 per year. The DX Bulletin is published at 306 Vernon Ave., Vernon, CT 06066 Second-class postage paid at Vernon, CT. POSTMASTER: Send address changes to The DX Bulletin, 306 Vernon Ave., Vernon, CT 06066.

Two weeks ago we asked if any readers had worked VU7AN during the two-day operation in August. Several on the West Coast have reported snagging them, on Aug 12 and 13, on 21095. Unfortunately, although one of the Japanese operators is said to be in Washington DC now with his paperwork, we continue to get word that the operation was NOT authorized and thus will not count for DXCC. As of now, Newington DXCC has received no documentation for the operation, one way or the other.

FB8WG Crozet continues active on 14170, 21170, and occasionally on a "list" operation Saturdays on 21280 at 1600Z. He is still not at the date by which he had planned to be really active, and is still using the rhombic aimed at France. California stations report him just barely readable, at best.

4U1ITU at Geneva will be activated on CW Oct 30 to Nov 2 by Wolfgang Wessely, DJ3TF, possibly including 160 Meters. QSL to DJ3TF.

PJ8UQ St. Maarten last weekend was a multi-transmitter contest operation by W1HCS, W8B8TH, W1XK, K1GW, and W1PH.

Latest VP8AEN S. Georgia list info is that KC4CT compiles the list Mondays, 2300 on 14210; VP8AEN then shows the following Thursday, 1000Z, on 14210.

KC6CG is active again from the West Carolines...try 1100Z Saturdays, 14285.

Organization of a new Central California DX Club continues, and fifty five DXers have signed up as charter members. Their Board members are W6BYH, W6UZ, W6YO, W6GR, W6ZZC, W6MEL, and N6AWD; the Board will meet Nov. 1 to choose temporary officers until an election can be held. All interested DXers are invited to contact W6BYH, L.W. Brammer, 1227 Princeton St, Delano CA 93215 for further information.

TDXB: 203-871-6251

Phone in your information. Phone or write for report forms and envelopes.

The Northern California DX Foundation is compiling a listing of DX clubs around the world. Please send them a note giving your club name, address, officers, etc, to Stan Kaisel (Treasurer), 600 Albion Avenue, Woodside CA 94062. While you're at it, send a copy to TDXB, too.

Several times each winter Stew Perry, W1BB, publishes a newsletter devoted to 160 Meters. The first of this season is off the press and jam-packed with gossip, general information, and even some technical tips on 160 Meter antennas. Stew observes that this year will be exceedingly interesting, with more countries now able to operate Top Band, U.S. stations allowed kilowatts, etc. You can get a copy by sending an SASE to Stew Perry, 36 Pleasant St, Winthrop MA 02152. And tell Stew TDXB sent you.

We have seen a brochure on the new Signal One radio, called the MILSPEC 1030; it will sell for \$5000 (plus filters). Availability around the first of 1982. The previous model CX-11 is out of production and no longer available. Features are too numerous to mention; you can get the spec sheet from Payne Radio, PO BOX 100, Springfield TN 37172.

Your TDXB editor took down his 10 Meter yagi (the infamous "ICBM") and replaced it with a TH6DXX; we are now operational on all six hf bands, again. It is hoped this will make our listening and operating more rounded and TDXB will thus benefit. And maybe we can work those last sixteen DXCC countries needed here, too!

Spud Monahan, K6KH, reports on the recent ARRL SW Division Convention in Scottsdale AZ. Both the new Signal One and the Yaesu FT-1 were displayed, the Yaesu apparently the only one in the U.S. There was a bus tour of the Barry Goldwater (K7UGA) station, which is impressive. Incidentally, you can borrow a slide presentation of K7UGA from the ARRL film library in Newington.

Make your call now...if you still need South Sandwich (as many, many do) LU3ZY will be active until the end of Nov; lists 14240 at 0000Z Monday and Wednesday, 14240. We are still trying to figure if operator Carlos is the same one from two years ago.

BANDPASS: Call/Frequency/UTC (plus West, Central, East Coast report)/Day of Month

W1/W2/W3: Please mail reports by Saturday; All others, please mail by Friday. Thanks.

Last issue's list of "Rules" for list operations really should have called them "maxims," not rules. We are hoping readers will contribute other maxims to the list.

W7PHO writes to say that BV2B now has government permission to operate on 15 Meters, but has not been assigned specific frequencies for that band yet. BV2A/B has weekly schedules on 28575 at 0000Z (Saturday) and 14225 at 1400Z Wednesday.

A project W7PHO has been running for some time is providing reconditioned antenna rotators to deserving DX stations; present needs are for two, one for 9M8 and one for ZK1. TDXB is sending Bill some CDE parts for Ham-M rotators. If you have anything of use (don't send money!) send to Bill Bennett, 18549 Normandy Terrace S.W., Seattle WA 98166.

Aren't power-line RFI leaks fun? We have a new one here in TDXB's backyard, about 3/4 mile away, S8 7-28 MHz. Local subscribers will be interested in what sort of joy we can get from Connecticut Light and Power, and we'll keep you informed.

VK9ZG on Willis can be found on a "list" operation Thursdays, 0915Z, 14331, by VK6YL.
